

# Process on Automatic Installation for Corporate Users

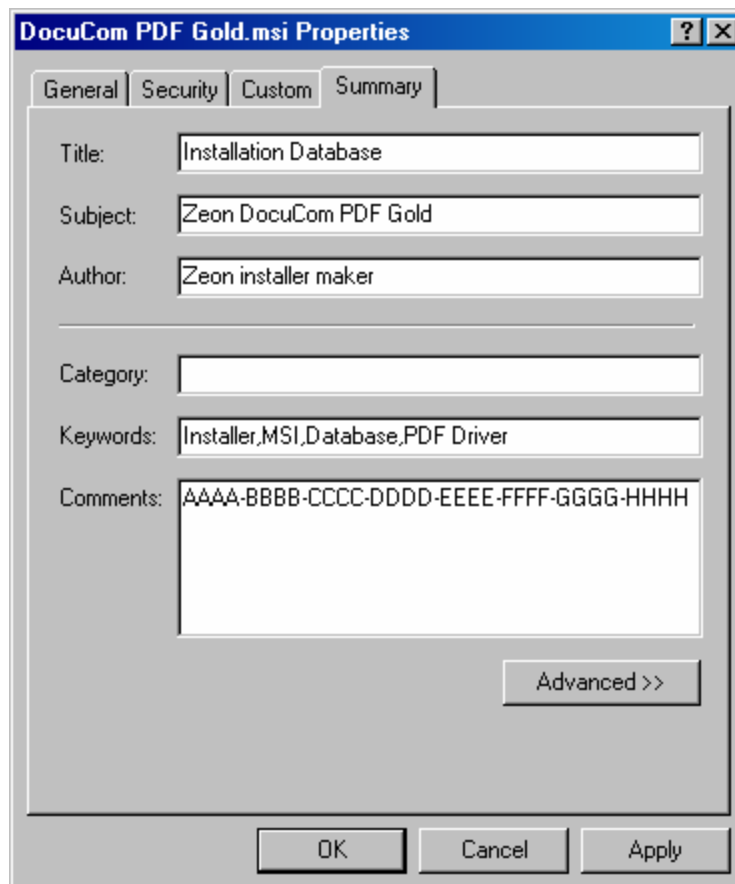

A special solution to remotely install and activate DocuCom Products for computer on each client side within the corporate network has been provided for corporate users. Below are the detailed steps to show how to automatically install Zeon DocuCom series Products by using Microsoft Windows Active Directory Service or Microsoft Systems Management Server.

1	Via Microsoft Windows Active Directory Service .....	2
1.1	Modify the MSI installer .....	2
1.2	Assign the product .....	3
2	Via Microsoft Systems Management Server (SMS) .....	7
2.1	Create the package .....	7
2.2	Create the advertisement .....	14
	Copyright 1993-2005, Zeon Corporation.....	18

# 1 Via Microsoft Windows Active Directory Service

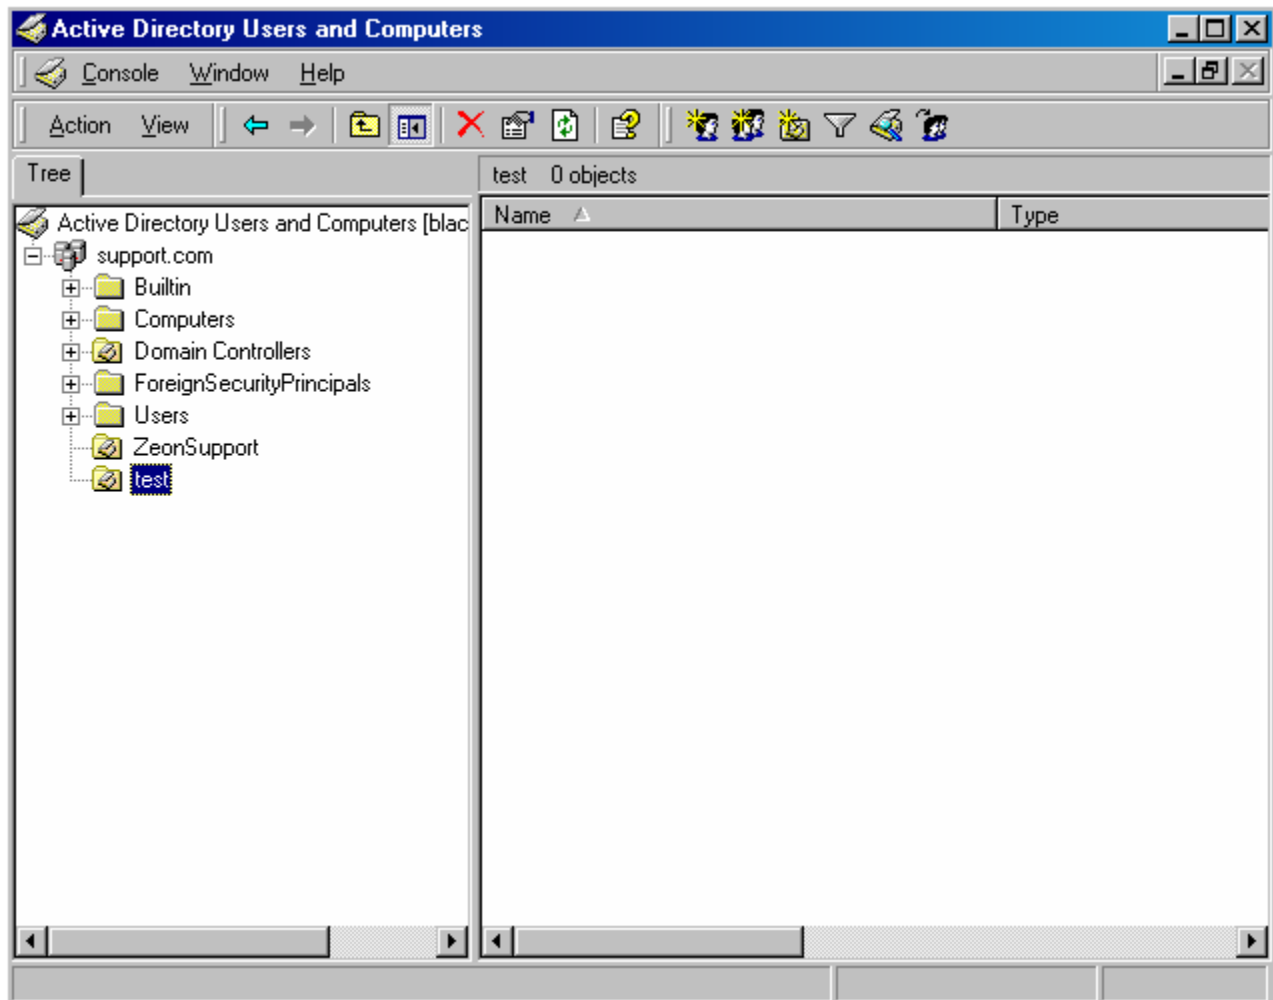

## 1.1 Modify the MSI installer

1. Firstly, download the MSI installer at <http://www.pdfwizard.com/eng/qa/downloadall.asp>
2. Right-click the downloaded MSI installer, and just copy your valid serial number to the Comments property in the Summary tab, then click "OK".

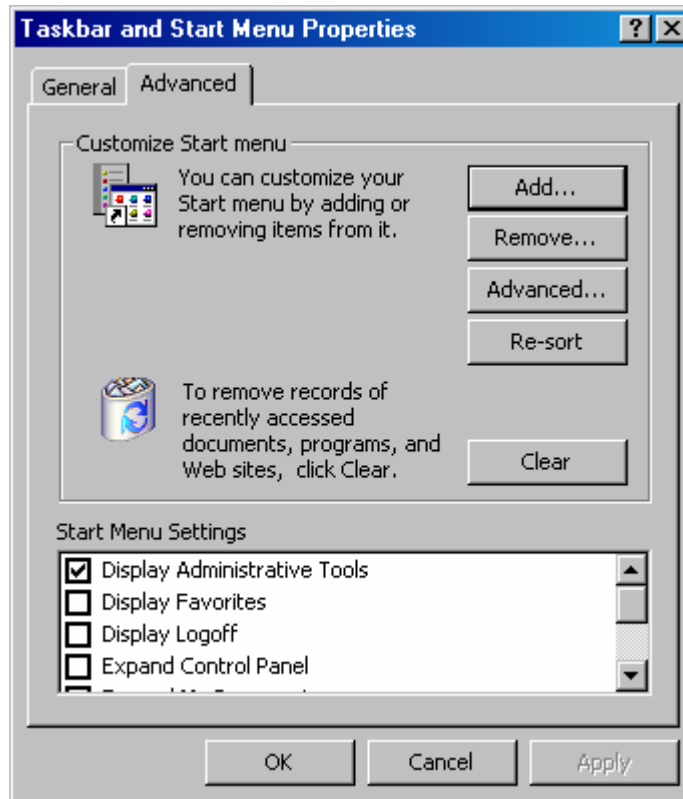

## 1.2 Assign the product

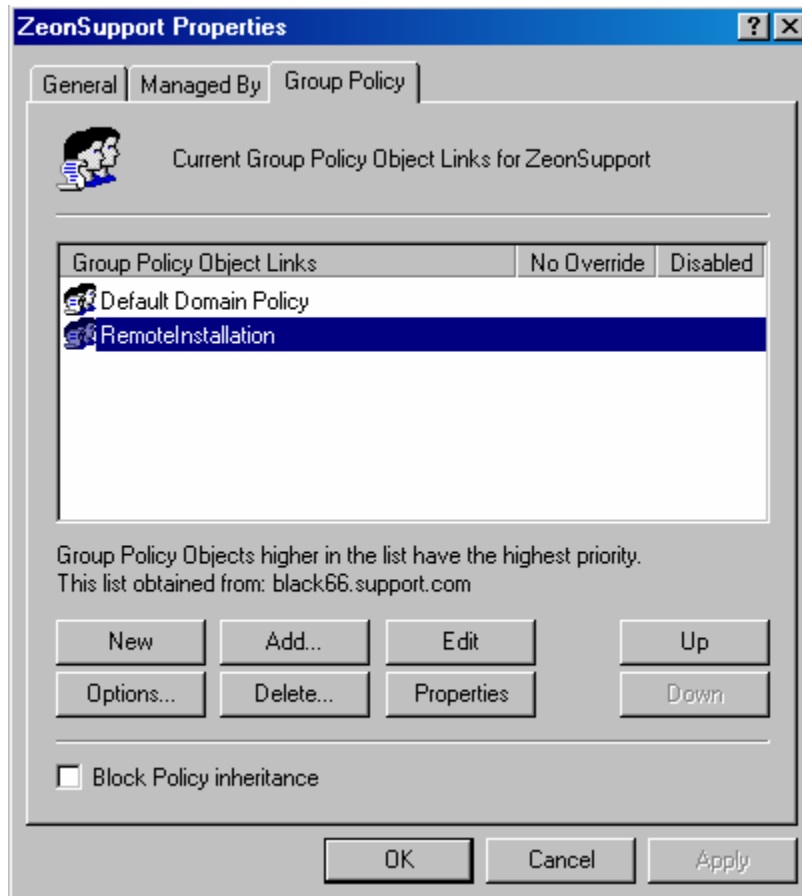

1. On the server, choose “Start>Programs>Administrative Tools”, and click “Active Directory Users and Computers”. This step starts Active Directory Users and Computers Microsoft Management Console (MMC).

**Note:** If Administrative Tools was not found. Please right-click taskbar and click “Properties”, select “Display Administrative Tools” on the “Advanced” tab.

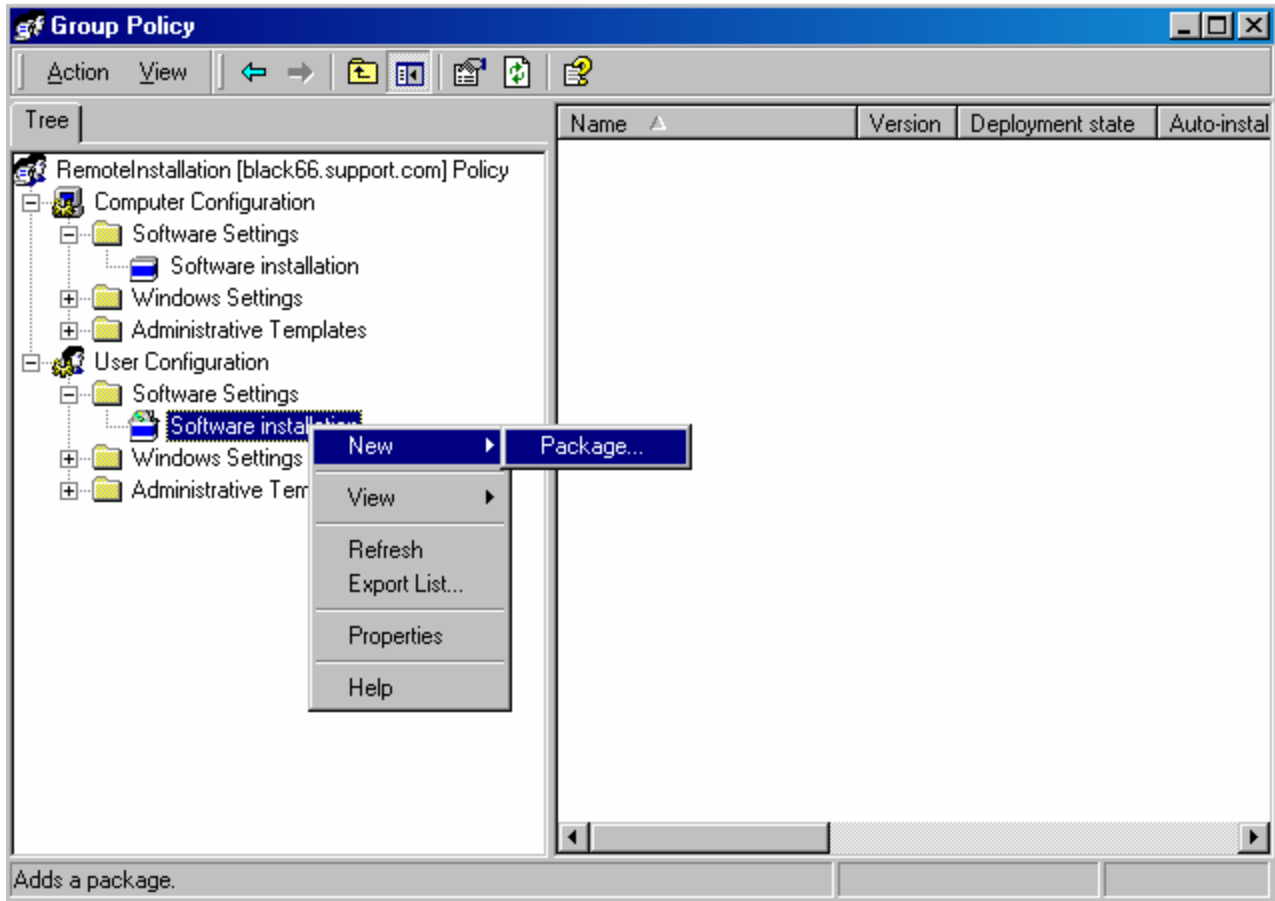

2. Right-click the Organizational Unit which you want to install the package and select "Properties".

3. In the Group Policy tab select a Group Policy Object or create a new one, and click Edit. The Group Policy MMC starts.

4. In the Group Policy MMC, expand the “Computer Configuration>Software Settings” or “User Configuration>Software Settings”. Right-click Software installation and select New>Package....

5. In the Open dialog, browse the installer and click open.

**Note:** MSI installer requires the client computers to have the MSI 2.0 engine installed.

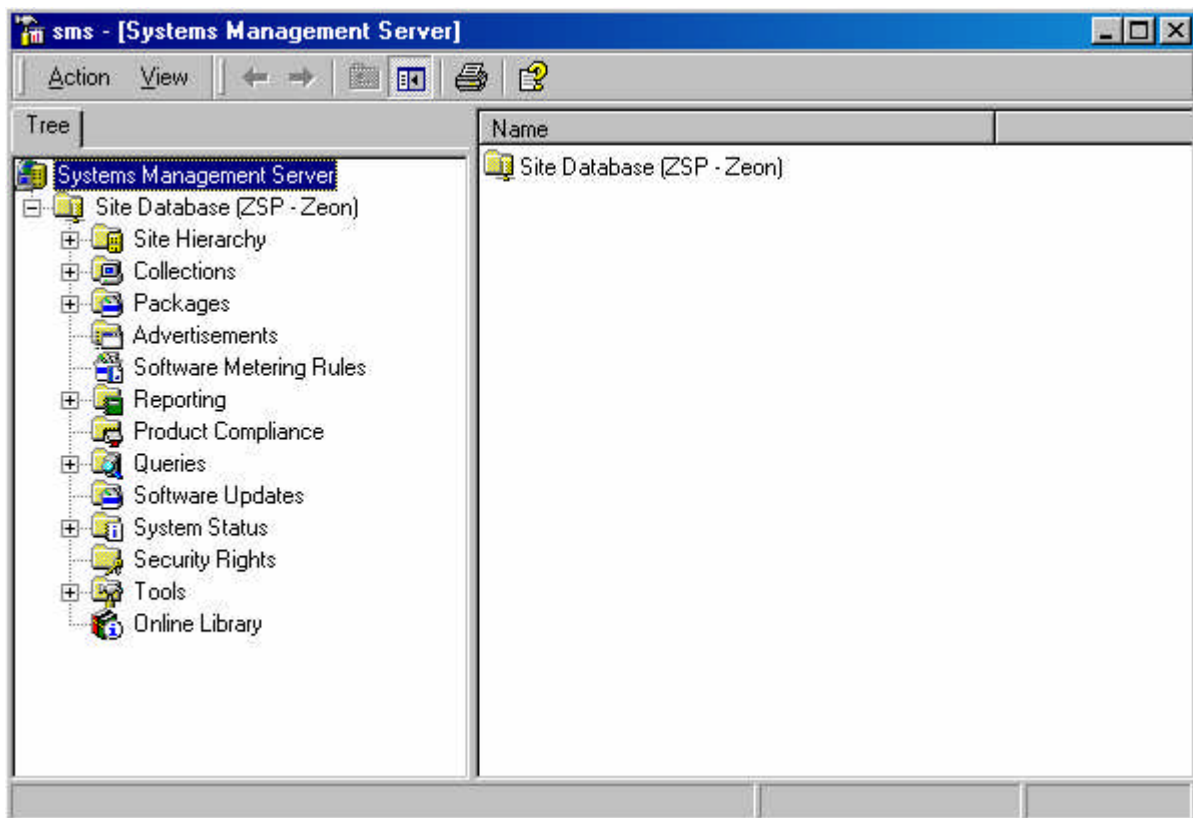

6. In the Deploy Software dialog, select Assigned and click OK.

## Via Microsoft Systems Management Server (SMS)

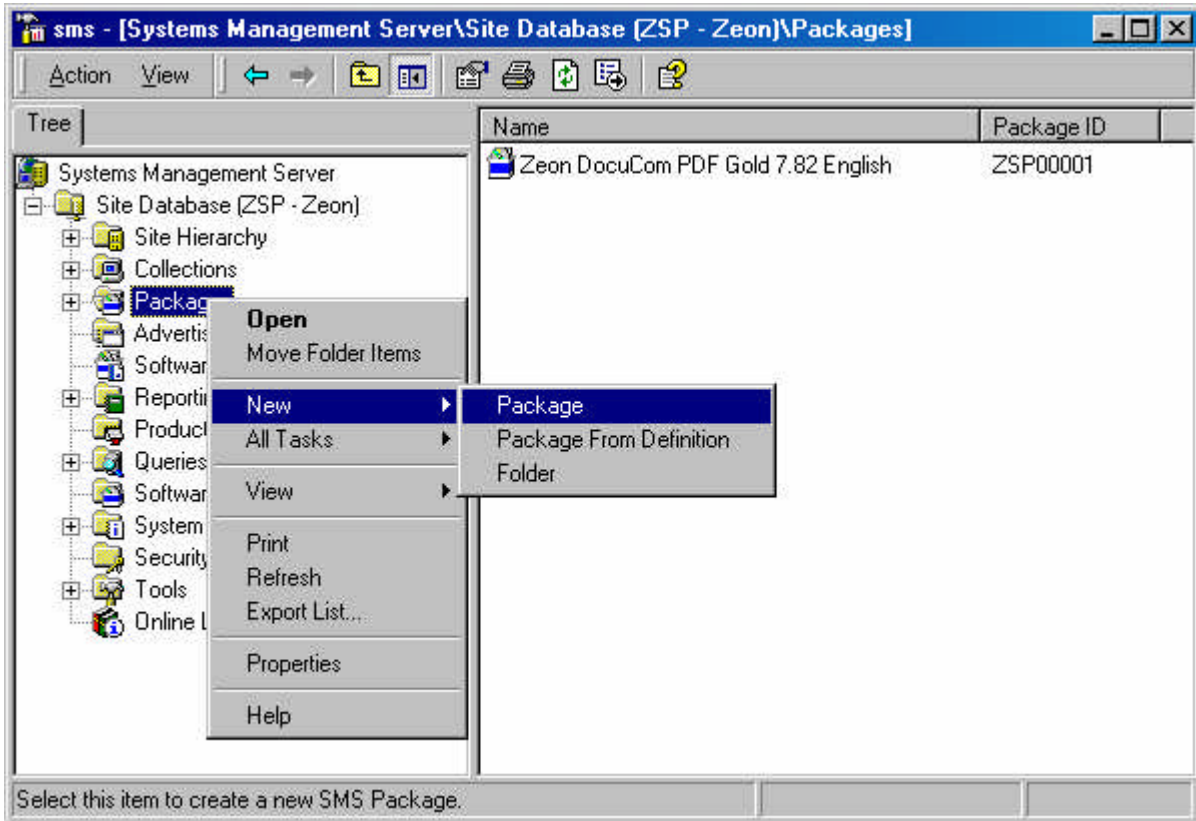

There are two ways to activate the products deployed with SMS. The first is to [modify the MSI installer](#). The second is passing the valid serial number to the installer while advertising the package.

### 1.3 Create the package

1. On the server, choose “Start>Programs>Systems Management Server”, click “SMS Administrator Console”. This step starts Systems Management Server MMC.

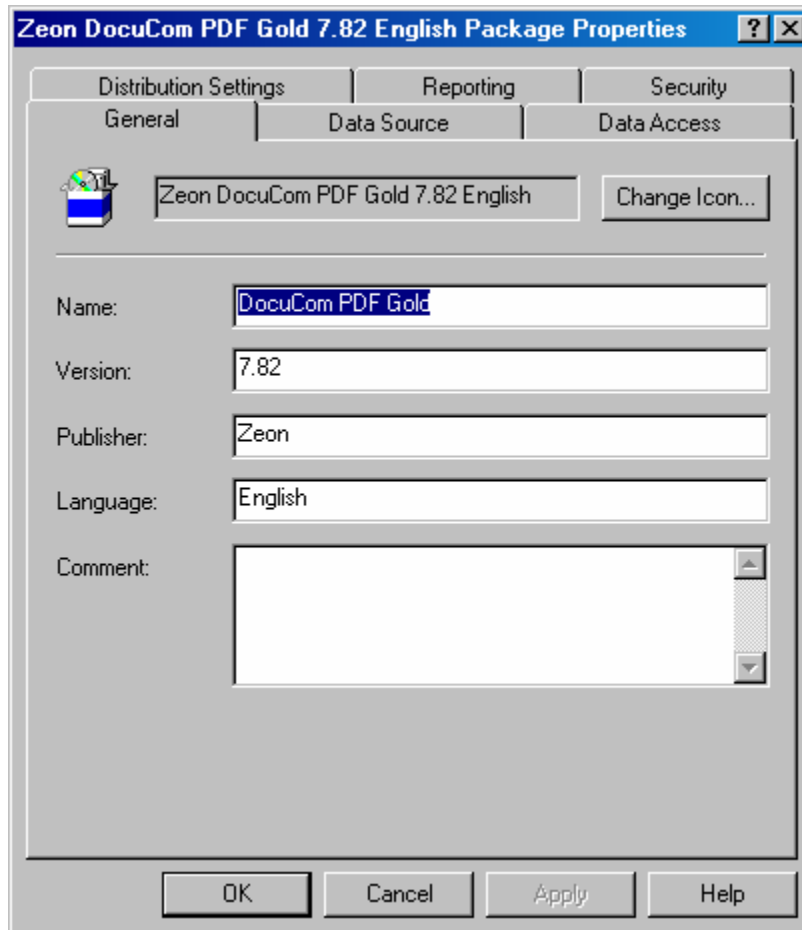

2. In the left panel, expand the Site Database tree, right-click Packages and select "New->Package".

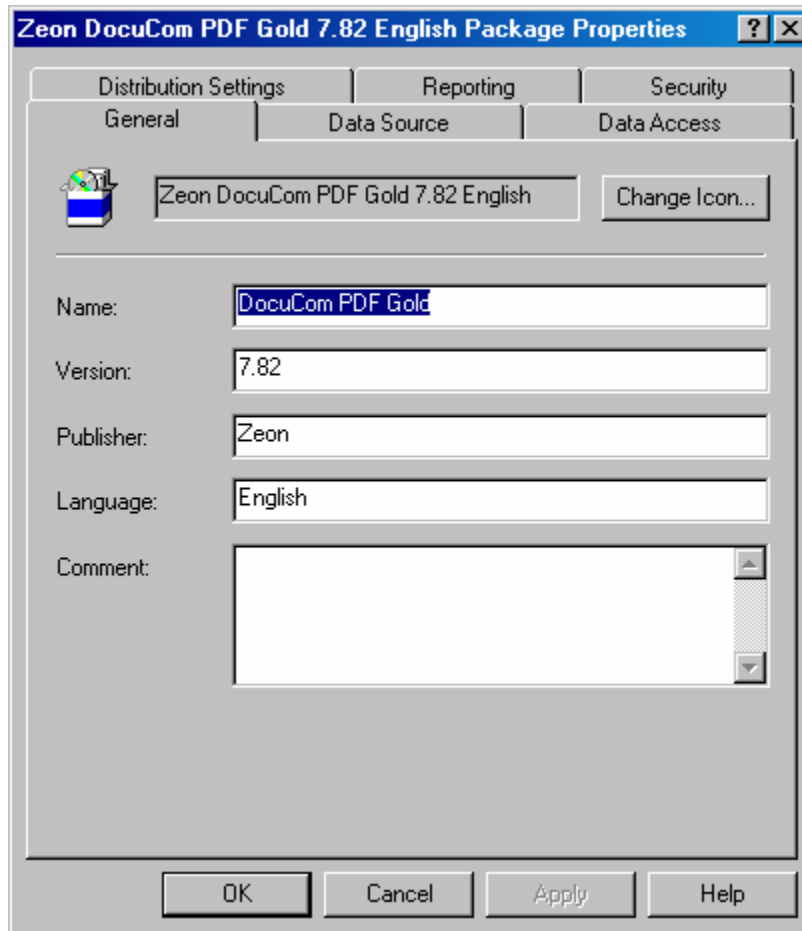

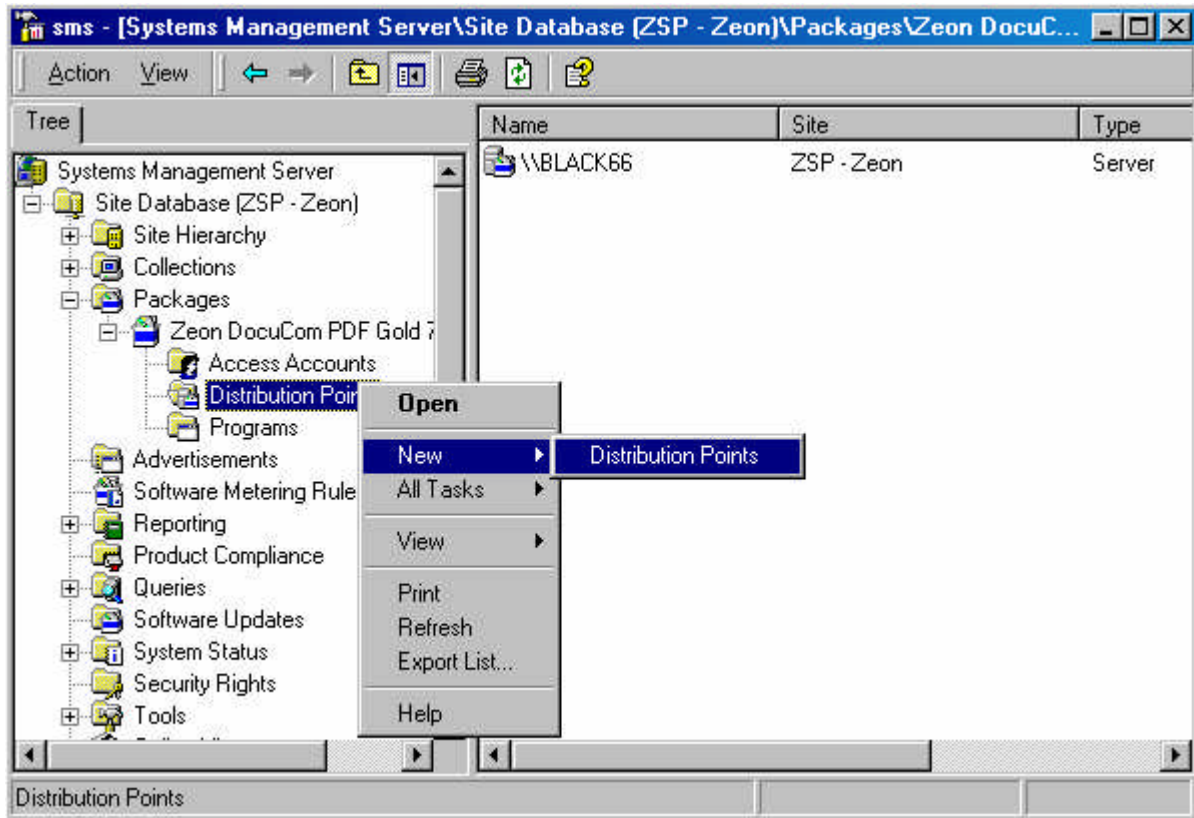

3. In the General tab, name the package and provide any of the following information:
- Version number of the software package;
  - Name of the software publisher;
  - Language version;
  - Description of the package

4. In the Distribution Setting tab, choose High from the “Sending Priority” menu, and click OK. The package should appear under the Package snap-in of the Site Database tree on the SMS console.

- Expand the package under the Packages snap-in, and then right-click “Distribution Points”. Select “New->Distribution Points”.

- In the “New Distribution Points Wizard” dialog, select the servers that you want to designate as the distribution points, and click Finish.
- Right click Programs and select “New->Program”. The “Program Properties” dialog box pops up.
- In the Command Line panel of the “Program Properties” dialog box, click Browse to locate the installer folder.

9. Do one of the following:

- Run the modified MSI installer

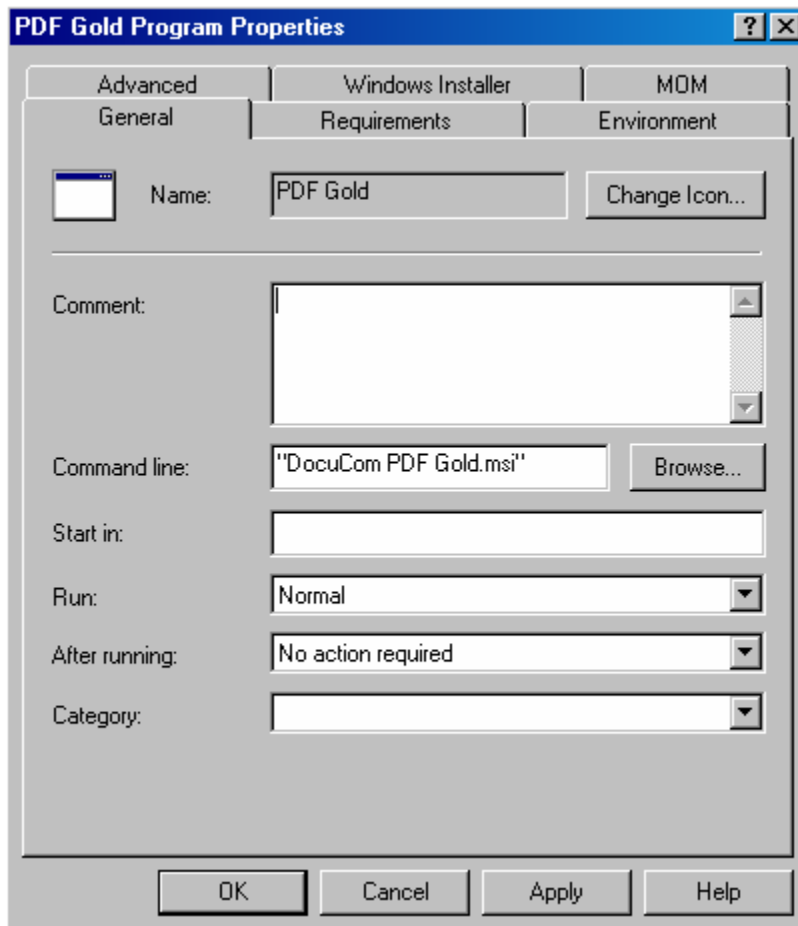

“DocuCom Product.msi”

- Run the original installer

“DocuCom Product.exe” /s /w /v”DOCUCOMSERIALNUMBER=”your valid serial number” /qn”

OR

Msiexec.exe /qn /i”full path to the msi file”  
DOCUCOMSERIALNUMBER=”your valid serial number”

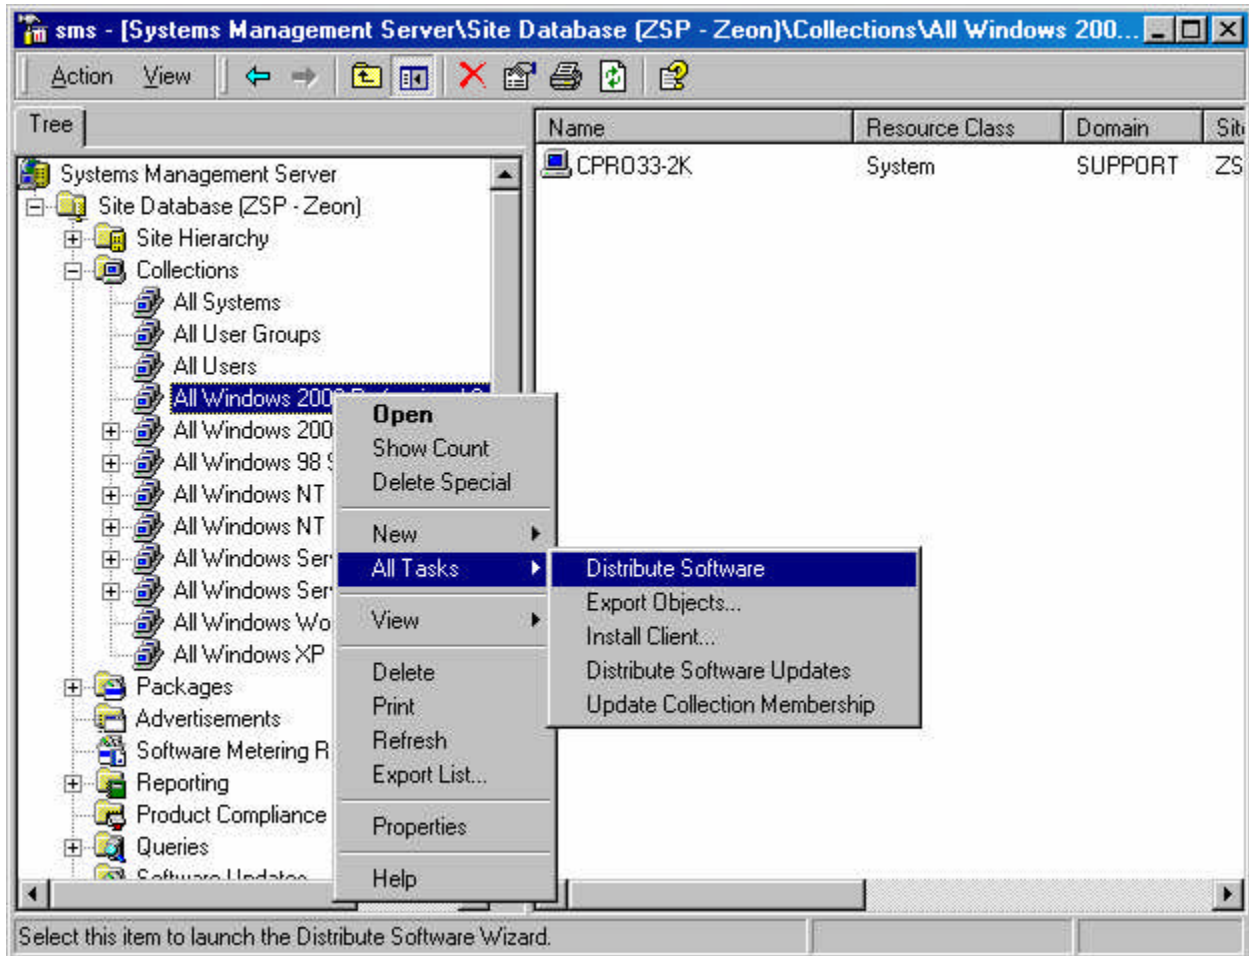

Note: MSI installer requires the client computers to have the MSI 2.0 engine installed.

10. In the Environment tab, click the Run with administrative rights option.

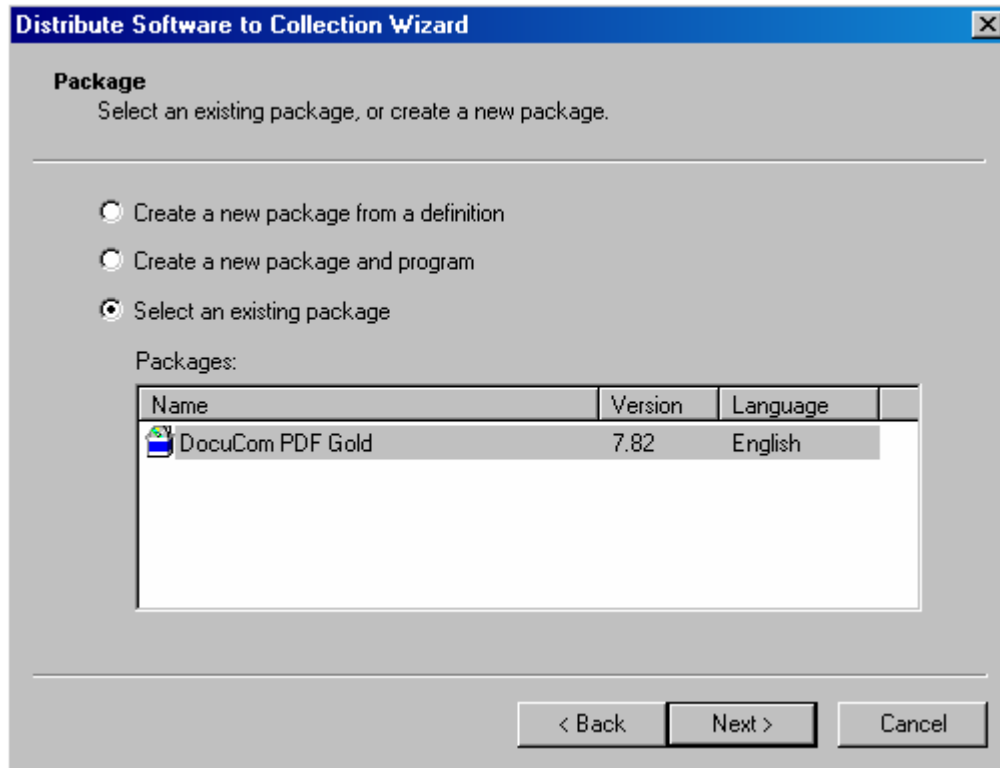

11. Click OK to display the SMS package.

## 1.4 Create the advertisement

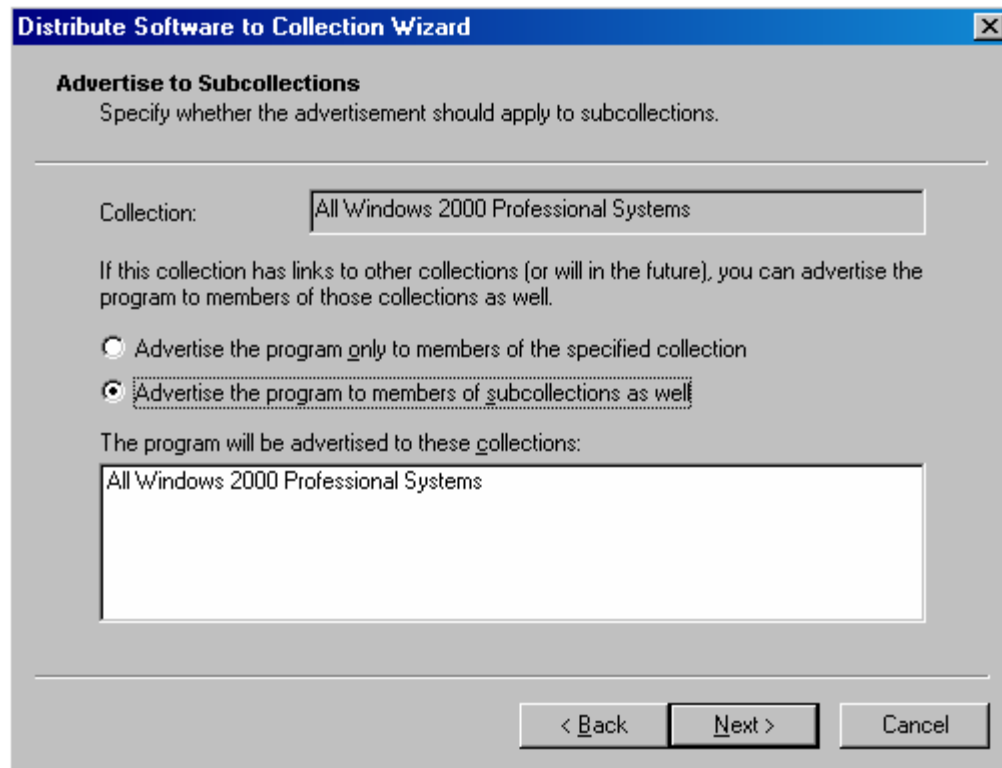

1. On the Site Database tree expand Collections, and right-click the collection that will receive the package; select “All Tasks>Distribute Software”. The Distribute Software to Collection wizard starts. Click Next.

2. In the Package dialog, select Distribute an Existing Package, and click Next.

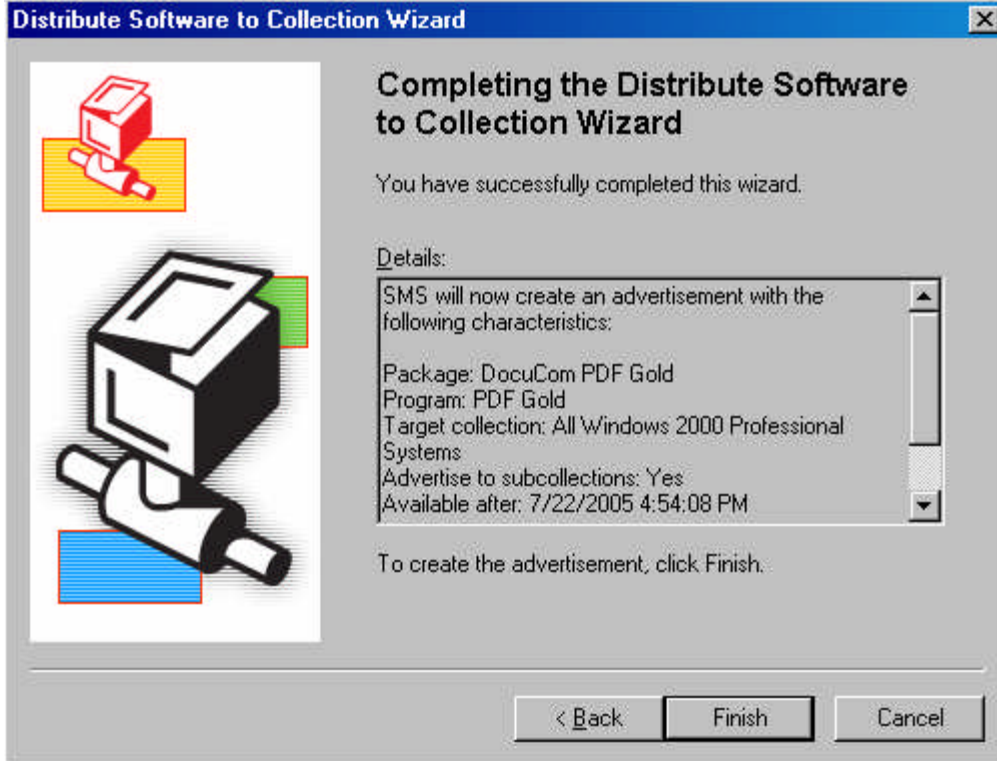

3. In the Select a Program to Advertise dialog, select the product and click Next.
4. In the "Advertisement Name" dialog, specify Name and Comment of the Advertisement and click Next.
5. In the "Advertise to Subcollections" dialog, specify any subcollections that should also receive the advertisement, and click Next.

6. In the "Advertisement Schedule" dialog, confirm or change the time that the advertisement is offered; then specify whether the advertisement should expire and when.
7. In the "Assign Program" dialog, click Yes to assign the program, and click Next.
8. In the Completing the Distribute Software to Collection Wizard dialog, review the settings you chose, and click finish.
